BS
6375-2:2009

Our multi-point lock range offers complete peace of mind on both security and reliability - our range has been tested extensively to the latest market standards.

Secured by Design

Official Police Security Initiative

Security

The Ingenious multi-point lock range is designed to comply with the UK police's flagship initiative SBD, supporting the principles of "designing out crime".

British Design

Nearly 50 years of experience has contributed to a range of high security multi-point locks, that were designed exclusively in Great Britain.

Guarantee

The complete range of Ingenious multi-point locks is supported by a comprehensive FIT & FORGET 10 year guarantee.

Intelligently designed multi-point lock technology.

A state of the art centre gearbox is at the heart of the Ingenious range - the mechanism of the lock is packed with features for complete peace of mind.

Hold back facility

An ergonomically designed hold back snib is on the faceplate to prevent accidental lock outs.

Dual follower gearbox

Designed with smooth operating, unsprung followers, the gearbox is available in two backsets, 35mm and 45mm. It also features the ability to have both front and back door applications as standard.

Smooth operation

The latest high specification materials and manufacturing techniques have been used to offer a smooth, flawless operation.

Slider technology

The gearbox has unique "slider" technology for a long lasting, smooth operation.

Auto-locking centre hook

All Ingenious multi-point locks feature a high security, auto locking centre hook.

Adaptive compression rollers

Engineered for compression and extra adjustment, all Ingenious multi-point locks have adaptive compression rollers, which engage before the locking points for smooth operation.
